

System Integration Project Presentation

Mikkel BOJSEN, Johan van BEUSEKOM, Andreas FOLDAGER,
Kasper JOHANSEN, Martin TANGE

DTU – Technical University of Denmark

May 31st

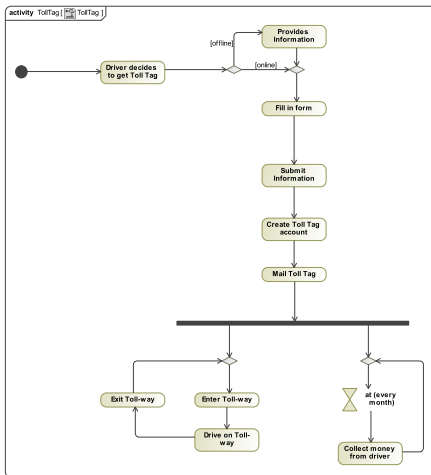

Outline

- 1 Introduction
- 2 Overall Design
- 3 Detailed Design
- 4 Behavior Design
- 5 Validation

Business processes

Toll tag example:

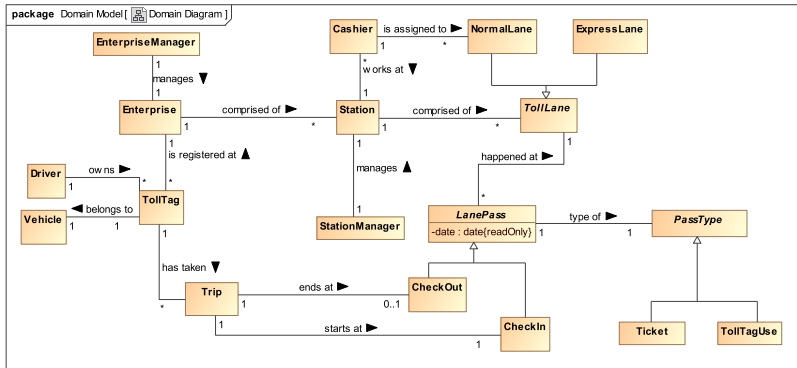

Priority of use cases

- Ticket check-in
- Ticket check-out
- Toll tag check-in
- Toll tag check-out
- Generate reports

Use cases

toll tag - check-in/check-out

Domain model

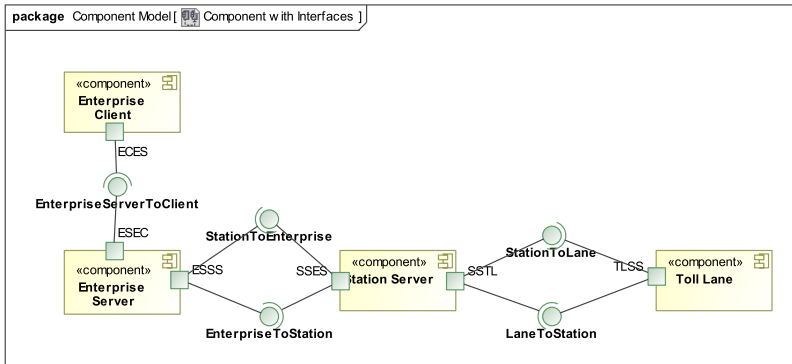

Outline

- 1 Introduction
- 2 Overall Design**
- 3 Detailed Design
- 4 Behavior Design
- 5 Validation

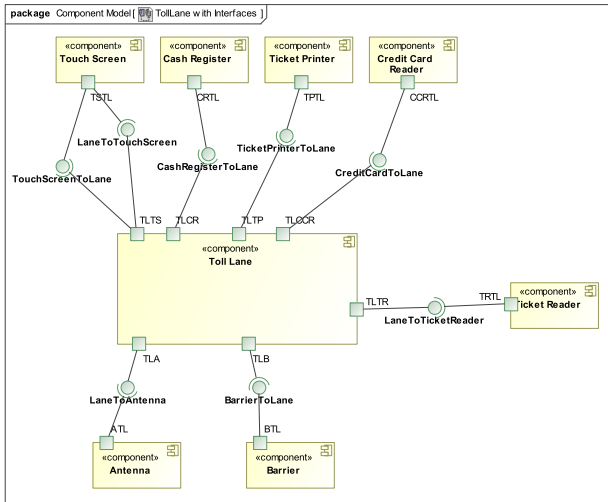

Assumptions

- Barrier functionality
- Bank communication
- Security
- Buy Toll tag implementation

Component Interfaces

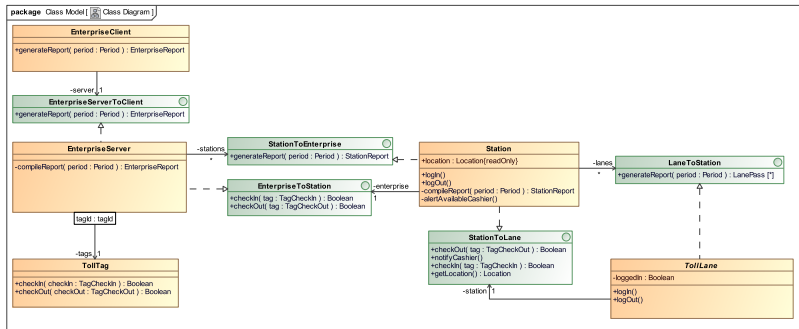

TollLane Interfaces

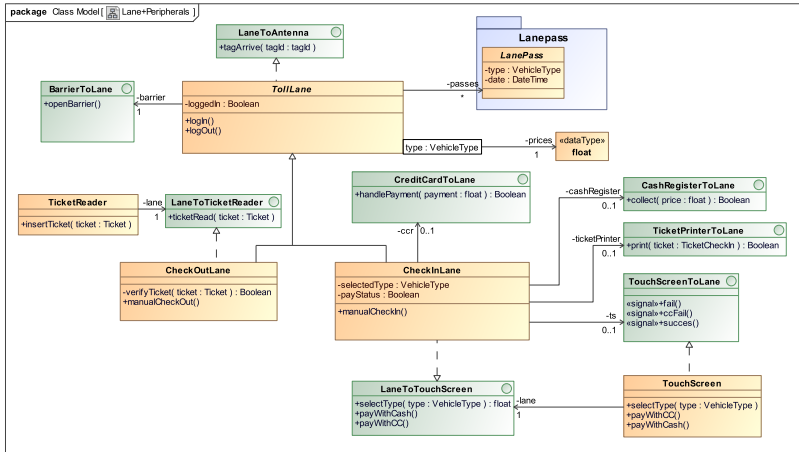

Outline

- 1 Introduction
- 2 Overall Design
- 3 Detailed Design**
- 4 Behavior Design
- 5 Validation

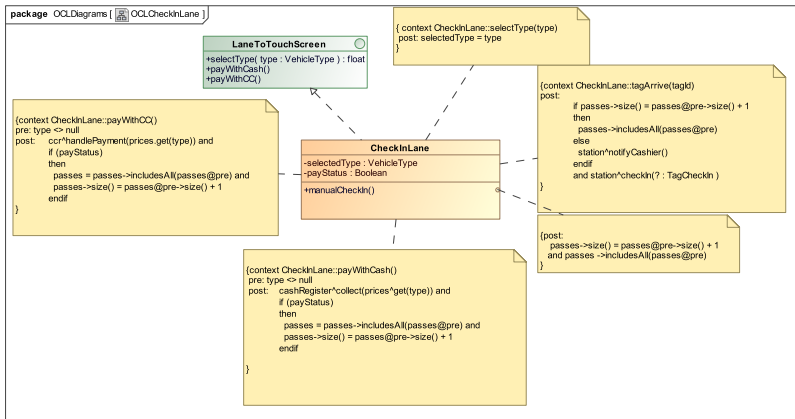

Class Diagram Overall

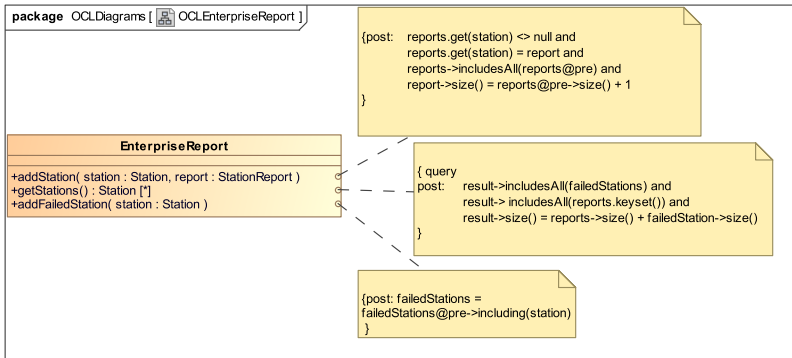

Class Diagram Lane & Peripherals

OCL: Check-in lane

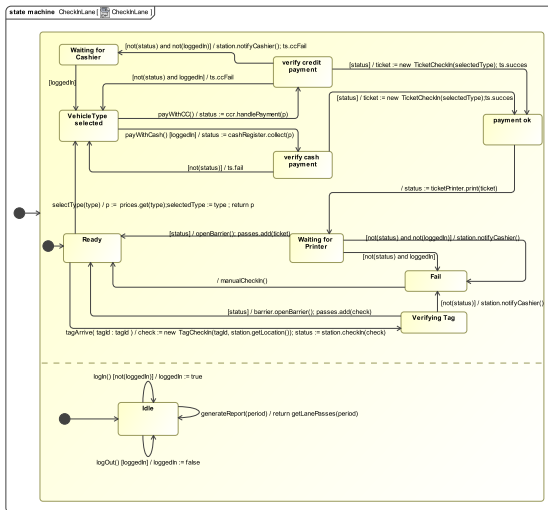

OCL: Enterprise Report

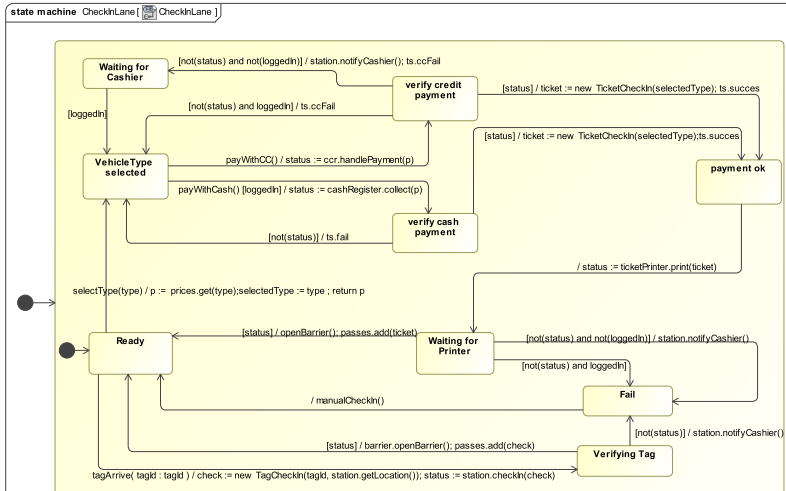

Outline

- 1 Introduction
- 2 Overall Design
- 3 Detailed Design
- 4 Behavior Design**
- 5 Validation

State Machine: Check-in Lane

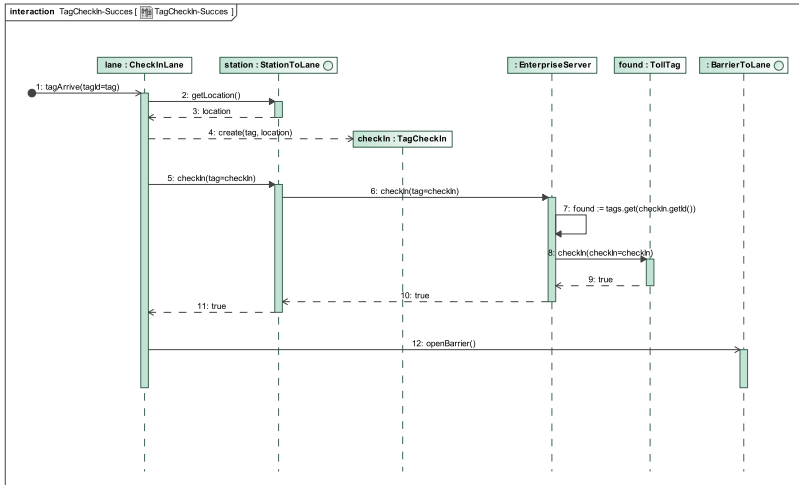

State Machine: Check-in Lane

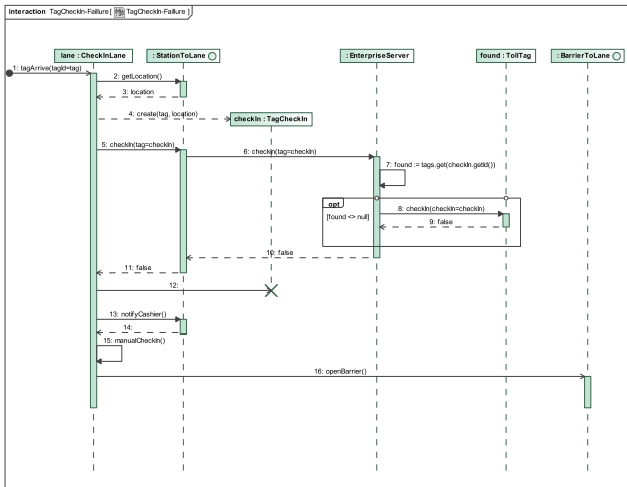

Outline

- 1 Introduction
- 2 Overall Design
- 3 Detailed Design
- 4 Behavior Design
- 5 Validation**

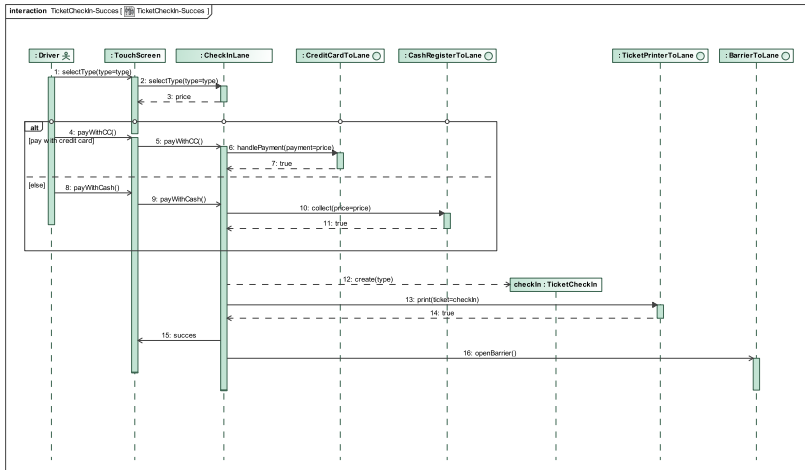

Sequence: Tag Check-in Success

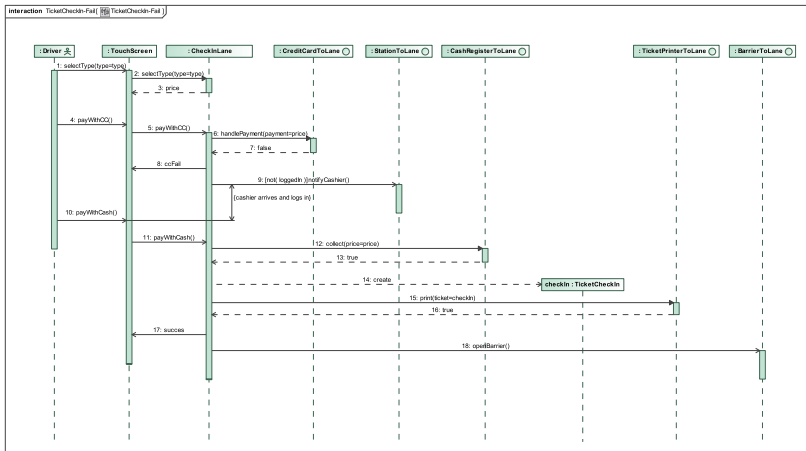

Sequence: Tag Check-in Failure

Sequence: Ticket Check-in Success

Sequence: Ticket Check-in Failure

Design Decisions

- Who creates the check-in objects
- Error handling (true/false vs. enums vs. exceptions)
